WIRELESS INTERNETWORKING.

Aim:

To design and configure an internetwork using a wireless router, DHCP Server and Internet Cloud.

ALGORITHM:

1. Open Cisco Packet Tracer.
2. Add a wireless router, DHCP Server and Internet Cloud.
3. Add the required wireless devices.
4. Connect the devices to the wireless router.
5. Configure the wireless router settings.
6. Connect the wireless devices to the network.
7. Verify the assigned IP address
8. Test Connectivity between the devices and Internet Cloud.

Result:

Thus, the wireless internetwork was successfully configured and Connectivity was verified.
