

EXP: NO: 12.a)

ECHO CLIENT - SERVER.

Aim:

To implement an echo client-server using TCP/UDP sockets.

ALGORITHM:

* Create the Server Socket.
* Bind the Socket to an IP address and Port.
* Start listening for Client requests.
* Create the Client Socket
* Connect the Client to the Server
* Enter a message from the Client.
* Sent the message to the Server.
* Server receives and echos the message.
* Close the Sockets

Result:

Thus the echo Client-Server was Successfully implement using Sockets-programming.
