ANALYSIS OF VARIOUS TYPES OF SERVERS USING WEBALIZER.

Aim:

To analyze the web server log files using the webalizer tool and study various server statistics such as numbers of requests, visitors, transferred data, URLs and response status codes.

ALGORITHM:

1. Start the webalizer application.
2. Install and configure webalizer on the system.
3. Locate the web server access log file.
4. Configure webalizer with the required log-file, data and output directory.
5. Run webalizer on the selected log file.
6. webalizer reads and analyzes the server log
7. It generates statistics such as:
   * Number of visits.
   * Number of requests.
   * Pages accessed.
   * Data transferred.
   * Referring sites.
8. Open the generated HTML report in a web browser.
9. Analyze the server activity using the generated graphs and tables.
